

Education-Elementary (grades 1-8)

At UW-Eau Claire

Teaching children and young adolescents is a very important and personally rewarding occupation. Becoming a successful elementary/middle school teacher requires hard work, creativity and responsibility. Teachers must understand the children they teach, know the content knowledge and communicate effectively. Great teachers are knowledgeable across broad content area.

Tell me more

The UW-Eau Claire Middle Childhood through Early Adolescence program leads to licensure to teach in elementary and middle-level schools in Grades 1-8 in the state of Wisconsin.

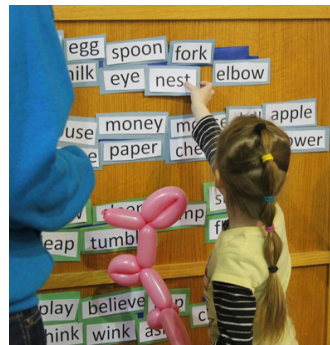

The Education advantage

UW-Eau Claire has earned an excellent reputation for the quality

of its preparation of teachers, and its graduates are employed throughout Wisconsin and the United States. Elementary education is one of the largest majors at UW-Eau Claire. It is a very competitive and selective program that offers one-on-one relationships with faculty who practice what they preach, allowing for opportunities for student teaching abroad, excellent networking with school districts, and strong collaboration among faculty across the College of Arts and Sciences to develop relevant course content for future teachers.

Confirm your passion

Instructional and informational technology are well integrated throughout the program, providing for mastery of emergent tools and materials. Early in the program, students work in schools to become acquainted with the professional responsibilities associated

with the profession and to examine their education and career goals.

Student teaching

An extended period of student teaching is required during a professional semester that allows students to apply their knowledge. Students may participate in overseas student teaching experiences through Educators Abroad and still meet Wisconsin Department of Public Instruction requirements. Students may also participate in student teaching experiences in a wide variety of settings outside of the Eau Claire area. Some examples of the immersion programs are Aldine School district in Texas, UW-System Urban Institute of Milwaukee Public Schools, Lac Courte Oreilles Indian reservations and Washington, D.C.

Great opportunities

The extras can make all the difference! At UW-Eau Claire, campus resources such as the Human Development Center and the children's literature collection help students become outstanding teachers. In addition, student organizations, such as the Future Teacher's Club and Student Wisconsin Education Association (SWEA), provide extra social and learning opportunities for students in education.

Majors

Middle Childhood through Early Adolescence (teaching in grades 1-8, ages 6-13)

Minors

French
General Science
German
Language Arts
Learning disabilities
Library Science
Mathematics
Science of Coaching
Social Studies
Spanish

Theatre Arts

Suggested freshman curriculum

University Writing Requirement — depending on placement exam.
For test-out options, see uwec.edu/Blugoldseminar/testout.
Intro to Cultural Anthropology
Intro to the Visual Arts
Fundamentals of Speech
Physical Science
Mathematics for Elementary/Middle Teachers I
General Biology
Western Civilization to 1660
American National Politics
Physical Education

Diverse teaching perspectives

In addition to traditional student teaching placements you may choose an intercultural immersion opportunity in Washington, D.C., Houston or Milwaukee. These options introduce students to a broad diversity of school settings.

"The MCEA program here is not about your 'adult life' in your future classroom, but finding that inner child in you and using it to make a difference in your future classroom."

—Kia
